

# FEEDBACK FROM RESPONDENTS TO THE ANNUAL CASC SURVEY

## MOST EFFECTIVE NCA\*

- 2010:** National Sentinel Stroke Audit
- 2011:** National Sentinel Stroke Audit
- 2012:** National Sentinel Stroke Audit
- 2013:** National Sentinel Stroke Audit
- 2014:** Sentinel Stroke National Audit Programme
- 2015:** Sentinel Stroke National Audit Programme
- 2016:** Sentinel Stroke National Audit Programme
- 2017:** Sentinel Stroke National Audit Programme

\*Note: The Myocardial Ischaemia National Audit Project (MINAP) was runner-up for four consecutive years from 2010-13.

## LEAST EFFECTIVE NCA

- 2010:** National Continence Care Audit
- 2011:** National Continence Care Audit
- 2012:** Heavy Menstrual Bleeding National Audit
- 2013:** National Diabetes Audit<sup>^</sup>
- 2014:** National Diabetes Audit<sup>^</sup>
- 2015:** National Audit of Rheumatoid and Early Inflammatory Arthritis
- 2016:** National Audit of Intermediate Care
- 2017:** National Clinical Audit of Psychosis

<sup>^</sup>Note: This result is skewed as it includes both the National Inpatient and Outpatient Diabetes Audit as respondents to the survey didn't always clarify their answer and hence data had to be amalgamated.
