

In-house Significant Event Audit Training

As part of Care Quality Commission reviews, all primary care providers are assessed to ensure that they deliver safe and effective care. Significant Event Audit (SEA) is an established risk management technique that enables practices to learn from incidents and strengthen patient safety. This one day course will help your organisation deliver first-class SEA that goes above and beyond CQC expectations. All primary care staff have a responsibility to ensure their working environment is safe. The course will be tailored to meet the needs of your practice as we use our barometer to diagnose current strengths and weaknesses. The course is interactive, practical and fun. We use confidential examples of significant events to enhance learning.

-  **LEARNERS** are provided with a comprehensive pack of SEA training materials
-  **UNDERSTAND** the seven-step SEA process and the eight stage outcome model
-  **PRACTICAL** experience of tools and techniques to enhance SEA in your organisation
-  **TUTORS** focus on the practical usage of SEA and ensuring a robust system is in place
-  **ACCREDITATION** provides a qualification that is valid for revalidation/PDP
-  **APPROVED** 99% of learners stated they would recommend it to others.

ARRANGING THE COURSE IN YOUR PRACTICE

The course is typically delivered in-house to a practice team. Or we welcome groups of local practices that club together to share the cost of the in-house training. This approach often works effectively as learners can share ideas and experiences. All learners receive certificates of attendance and learners can complete a short paper to gain the associated accreditation. Please contact us to discuss your requirements.
